Front-End Developer

I'm passionate about technology. I care about writing clean code and believe in doing things right the first time. I'm currently looking to leverage my skills in building Web and Mobile applications.

Portfolio:

Skills

- HTML5
- CSS3 (Flexbox, CSS Grid)
- SASS
- JavaScript
- TypeScript
- React + React Hooks
- Redux
- React Router
- React Native
- Git

Education

- Master's in Computer Science
  Teesside University- Middlesbrough, United Kingdom
- Bachelor's in computer science
  Elenki Institute of Engineering and Technology- Hyderabad, India

Projects

Budget Tracker:

- Initially, this project is developed using JavaScript in React. Upon learning TypeScript, upgraded to TypeScript.

- Budget Tracker is a responsive web application for money management which helps to keep track of income and expense transactions which features nice visualizations using Chart.js library.

Music Player:

- Upon learning React Native, developed this application to gain experience in developing mobile applications.

- Music Player is a mobile application which runs on both Android and iOS devices to play music. It allows user to play/pause/play next/play previous song using expo-av library.

Hobbies - Listening Music, Decorating, Drawing
